# Product Overview

## ◎ Reflector

(MS-2)

Retroreflective photo sensor is sold with a basic reflector. You can select other reflectors for the proper install environment.

※Select proper reflector size for the install space.

※Basically the bigger reflector size has the longer sensing distance.

※High reflectivity reflectors (MS-2S, MS-3S) tend to have longer sensing distance than a basic reflector's sensing distance.

### ● MS-2, MS-2S (High reflectivity reflectors)

### ● MS-3, MS-3S(High reflectivity reflectors)

### ● MS-4

### ● MS-5

(unit: mm)

## ◎ Retroreflective tape

※Use the retroreflective tape at the place where is difficult to mount a reflector of the retroreflective photoelectric sensor.

※According to the environment, select the proper retroreflective tape. (Cut the tape before using.)

※Generally, the sensing distance and minimum sensing target size increase as tape size increases.

(unit: mm)

	A	B
MST-50-10	50	50
MST-100-5	100	100
MST-200-2	200	200

※There may be a  $\pm 0.02$ mm error in thickness dimension.
