2. Choose *I AGREE* to accept licence agreement and to continue with installation:

3. Select installation type and proceed with <u>NEXT</u>:

◆DATALOGIC...

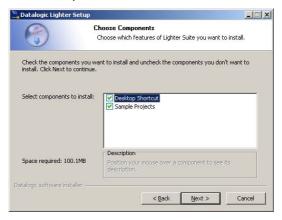

INTERACTIVE

- Installs both Laser Editor and Laser Engine.
- Use this option if you are installing the software on the PC that will control the laser locally (SLAVE device).
- This option will install components for editing layouts and controlling the laser source locally.
- This option allows the laser source to be controlled by MASTER device via Ethernet.

SUPERVISOR

- Use this option if you are installing the software on the PC that will control the laser source remotely (MASTER device).
- This will install components for editing layouts and control the laser source via Ethernet.
- This option allows the laser source to be controlled by MASTER device via remote ActiveX control.
- **4.** Choose components to install and press <u>NEXT</u> to continue:

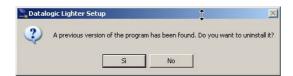

5. Choose installation destination folder and select *INSTALL*:

WARNING:

If a previous version is detected, please uninstall it.

If Laser Engine is running the following warning message will be displayed:

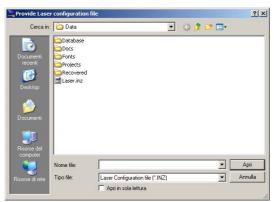

WARNING:

Close Laser Engine and click on "Retry" button to continue!

6. A properly configured LASER. INZ file, containing the settings for your laser source, must have been provided by Datalogic Automation in the installation USB pen drive. Select the file and continue with installation selecting *OPEN*; if you don't have any such file, prompt Datalogic Automation.

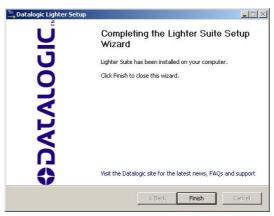

WARNING:

If there was an earlier version, the file laser.inz is not required!

7. To complete installation select *FINISH*:

NOTE:

It is important turn ON the rack Vlase before turning on the PC.
