

## S62 SERIES

S62 photoelectric sensor line offers compact dimensions and competitive prices for all basic and advanced models.

All universal optic functions are available at best performances in the standard 50x50x18 mm compact plastic housing with IP67 mechanical protection.

Laser emission models for high resolution detection are also available for polarized retroreflex, diffuse proximity and background suppression. S62 allows a great versatility of installations with Vac/dc multivoltage power supply and SPDT relay output, as well as 10-30 Vdc version with NPN/ PNP configurable output or NO-NC standard outputs. The connection is available with 2 m cable or M12 4-poles rotatable connector.

S62 series is the first choice when looking for a photoelectric sensor with the best price / performance ratio in a compact standard case.

## HIGHLIGHTS

- High-resolution sensors with **LED** or **LASER** emission
- High installation flexibility
- Background suppression, retroreflex polarized and diffuse proximity Laser versions
- **Vac/dc** multivoltage version
- Sensitivity/distance adjustment trimmer
- **Cable** or **M12 rotatable connector**
- PNP, NPN, PNP/NPN or SPDT Relay output

## APPLICATIONS

Ceramics

Beverage & Bottling

Transportation lines

Packaging lines

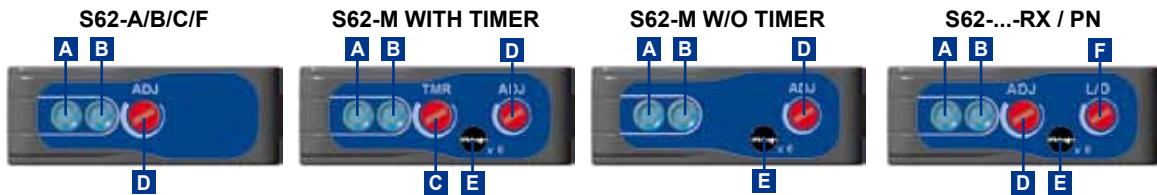

The background suppression proximity can set very precisely the limit over which the object is not detected, with minimum differences also between objects with material or colour differences. The threshold switching adjustment is easier and more precise thanks to the multiturn mechanical trimmer and the gear numeric scale. The polarised retroreflex, thanks to high-polarisation optic filters, detects very reflective objects even with mirror surfaces, that however do not rotate the polarisation plane of the reflected light, like the prismatic reflector.

## DIMENSIONS

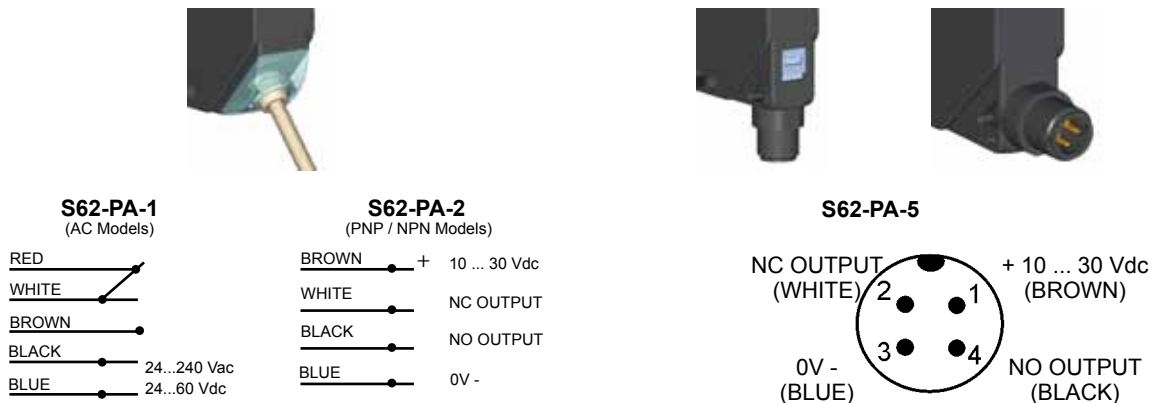

## INDICATORS AND SETTINGS

- A** Output status LED
- B** Stability LED or Power ON LED (laser vers.)
- C** Timer adjustment trimmer
- D** Distance adjustment trimmer
- E** Geared numeric scale
- F** Light / Dark selection trimmer

## CONNECTIONS

## TECHNICAL DATA

	S62-PA-2/5 LED/LASER Vdc	S62-PA-1 LED Vac/dc
Power supply	10 ... 30 Vdc	24...240 Vac/ 24...60 Vcc
Ripple	≤ 2 Vpp	10% max
Current Consumption	<30 mA	< 3 VA
Output current	≤ 100 mA (overload and overvoltage protection)	2A max (resist load)
Saturation voltage	≤ 2 V	-
Emission type	RED(640nm)(S62...A/B/C/G)	
Dielectric strength	500 Vac 1 min., between electronics and housing	
Insulation resistance	>20 MΩ 500 Vdc, between electronics and housing	
Mechanical protection	IP67	
Ambient light rejection	According to EN 60947-5-2	
Vibrations	0.5 mm amplitude, 10 ... 55 Hz frequency, for each axis (EN60068-2-6)	
Shock resistance	11ms (30G) 6 shock for every axis (EN60068-2-27)	
Housing	ABS	
Indicators	OUTPUT LED (yellow)/STABILITY LED(green)	
	S62...G (emitter): POWER LED(green)	
Adjustment	Sensitivity adjustment trimmer	
	Mono-turn light/dark trimmer(S62...RX/PN)	
Timing function	0...1 s (DELAY off)	
Connection	Cable vers.: 2 m Ø 4 mm	
	Cable vers.: 2 m Ø 5 mm (AC version)z	
	Connector vers.: M12 4-pole connector	
Lens material	PMMA window, polycarbonate lens	
Weight	40 g max mod. M12	
	90 g max mod. cable	
Operating temperature	-10...+55°C	
Storage temperature	-20...+70°C	
UL requirements	VDC models: they are intended to be connected to a Class 2 transformer or class 2 power supply. VAC models: these devices shall be connected to a powersupply or system,including filters or air-gaps, of overvoltage category II ("load level – secondary circuit of a protected utility transformer"), suitable to control over-voltages at the maximum "rated impulse withstand voltage peak of 1.2KV and with a short-circuit power limit at max 500VA.	

## EMISSION TYPE

The very low black/white difference of background suppression sensors allows to detect a dark-coloured target presence, or absence, even onto a light-coloured very reflective background. However, if the target is much smaller than the light spot and smaller than the background area, the detection can be critical either for the low resolution and for the 'cross-eyed effect' (excessive light reflected by the background).

The narrow collimated light beam of the **S62** LASER background suppression sensor is the right solution able to offer the requested resolution and avoid the cross-eyed effect, thus permitting the detection of the smallest objects or their minimal movements, even in presence of large and reflective background area. The LASER polarised retroreflex sensor of the **S62** series, as well as increasing the maximum operating distance, offers the improvement of the detection resolution thanks to the smaller dimensions of the light beam respect to the LED emission beam.

Basically, the minimum detectable dimension corresponds to the emission beam diameter at the detection distance. The maximum resolution can be obtained only with micropismatic reflectors (0.8 mm microcubes), such as the small **R8** suitable for short distances up to 2 m, or the **R7** and **R20** models for distance up to 22 m.

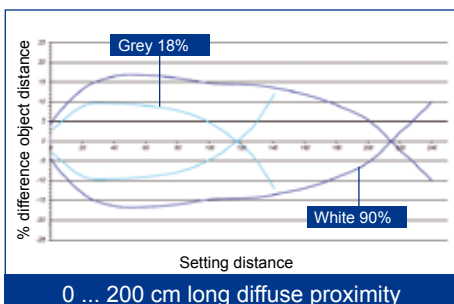

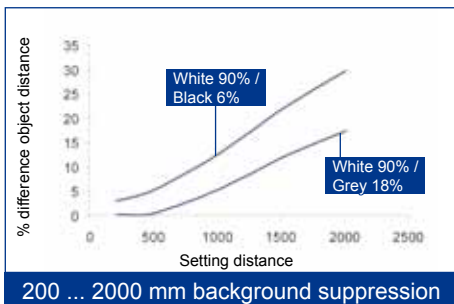

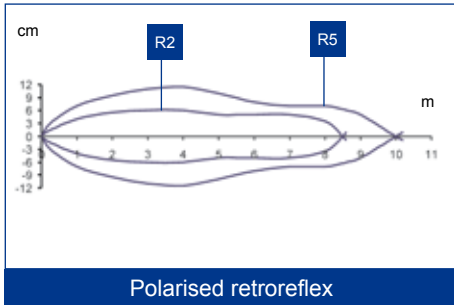

## TECHNICAL DATA OF MODELS WITH LED EMISSION

OPTIC FUNCTION	EMISSION	OPERATING DISTANCE	CONNECTION	SETTING	OUTPUT	SWITCH FREQUENCY	RESPONSE TIME			
non-polarised retroflex	LED red (640nm)	0,1 ... 13m	Vac cable	mono-turn light/dark trimmer	relay	20 Hz	25 ms
