

RECTICUR D & D0 gR

500VAC / 440VDC & 440VAC (IEC)

IEC High-Speed D & D0 Fuse-Links AC-DC Protection

The D fuse-system is the first generation of screw fuse-systems in the German DIN standard. It is still used in many installations. This D system comprises the sizes DII, DIII, DIV, DV.

The D0 fuse-system is the most modern of the screw systems in the German DIN standard. This system comprises the sizes D01, D02 and D03.

Those D & D0 ultra-fast acting "gR" ranges are dedicated to semi-conductor protection, in applications where fuse-links are accessible to non-trained persons and can also be changed by them.

They are used for the protection of components such as diodes, thyristors or AC/DC motor drives. The "R" stands for the English word Rectifier. D & D0 fuse-links are available at the rated current range from 2A up to 200A.

Features & Benefits

- Insulated body suitable for high mechanical and thermal impacts
- Top and bottom contacts made of nickel-plated/silver-plated copper alloy
- Safe cut off short circuits and over currents due special design of fuse element
- Clear indication of operation condition due coloured indicator on top contact
- Low power dissipation
- Optimized size
- Resistant to aging

Technical data overview

Voltage	440 - 500 VAC 440 VDC
Ampere Range (A)	2 ... 200 A
Size per Standard	DII, DIII, DIV, DV & D01, D02, D03
Speed/Characteristic	gR
I.R. AC (kA)	100 kA
Product Size	D01 to D03 & DII to DV

Standards

IEC 60 269-4

DIN EN 60269-4 (VDE 0636-4)

DIN VDE 0636-3
