

## Cylindrical Reed Sensors with M8 Thread

### DESCRIPTION

MK07 sensors are magnetically operated Reed proximity switches in a cylindrical form with an 8 mm x 0.75 thread and connecting cable or coupler. The sensor can be screwed directly onto a fixed surface with the actuating magnet on the moving surface. The widespread termination "T" or "U" makes the MK7 series compatible with several inductive and magnetic proximity sensors.

### APPLICATIONS

- **Position and limit switch**  
Pneumatic or hydraulic actuator position  
Indication and end travel limit switch
- **Door and window contacts**  
Security system applications
- **Level sensor**  
Use with magnetic floats for water level detection in coffee makers, washing machines or dishwashers

### FEATURES

- Form A, B, and C available
- High power switches available
- Other cables, connectors and colors available
- Various case sizes available
- Five operate sensitivities available
- A choice of cable terminations and lengths are available

### DIMENSIONS

All dimensions in mm [inch]
