

Constant Current LED Power Supply

Product description:

This type of power supply is an exclusively designed stabilized power supply for LED lamp. With constant current (CC) technology, it is suitable for constant current lamps (350/500/700mA) connected in series.

The built-in protection circuit will shut down the power supply in case of such faults as: open circuit, short circuit, over load or over temperature. The power supply will restart automatically after fault correction.

Standards:

EN61347-1	UL8750
EN61347-2-13	UL1310
EN61547	
EN55015	
EN61000-3-2	
EN61000-3-3	
EN62384	

Characteristics:

- Universal input voltage
- Independent power supply for constant voltage and constant current LED lamp
- Terminal block input and output
- Class II protection against electric shock from direct and indirect contact
- SELV/UL 8750 class 2 output
- Open circuit, short circuit, over load and over temperature protection
- Auto restart after fault conditions removal
- Efficiency: 76% (AC230V, full load)

Note	<p>1.Tolerance : includes set up tolerance, line regulation and load regulation. 2.Tested at 100Vac input. 3.Tested at full load.Refer to "Power Factor" and "EFFICIENT"curve graphs. 4.All parameters NOT specially mentioned are measured at nominal voltage input, rated load and 25 of ambient temperature. 5.The power supply is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again."</p>
